

# Certificate Course in Diabetes

Delivered by

**The Indian Diabetes and CardioMetabolic Diseases  
Association and Elite Cardiology group**

## Our Motto

To provide excellent learning to interested medical/paramedical personnel in the field of diabetology. It aims to empower the interested students to be able to manage diabetes according to current evidence-based practice guidelines. In cities as well as rural areas, where there are limited facilities available and there are diabetic patients who are in ever-increasing numbers and such patients need knowledgeable persons to recognize their special needs and manage them. It must be noted that due to the lack of enough specialist doctors they are devoid of getting such kind of help. The trained doctors/paramedics would also have a better idea about the diagnosis of the complications and co-morbidities associated with diabetes and would also be better oriented as to how to manage such patients, when to timely take help of seniors, or when to refer these patients to higher specialties in case of need.
